Mr. Sevan Varteressian, Principal
California Green Designs
18025 Rancho Street
Suite 200
Encino, CA 91316

Dear Sevan:

I would like to express my sincere appreciation for a very successful installation of the 260 kilowatt solar energy generating system. I must confess that this system exceeded my expectations in terms of on time completion, minimal interference with Western Filter's production schedule and personnel, and the professionalism that your construction crew exhibited throughout the installation period. Incidentally, this month marks the first anniversary of the installation, and we did not experience a single instance of leakage or damage on the roof through the heavy rainfall of this past year.

Finally, I congratulate you for the honest and accurate estimate of energy savings you originally predicted from the solar system. I also thank you for your continued follow-up and monitoring of the system. Best wishes to you and your associates.

Sincerely,

Z. Paul Akian
